Re: Infringement notice of US Patent to UDE, you letter dated Oct. 14, 2016

Dear Mr. William Malherbe

- 1) UDE we highly respect (IPR) Intellectual Property Rights by never illegal manufacturing, adopting or selling structure products which are not been authorized. After conducted an official investigation on all existing product lines, we verified that all the connectors we produced are based on the structure developed with related patents applied by UDE. All patents UDE obtained/pending can easy be found thru Patent & Trademark office at each country we applied, *that supports UDE doesn't infringe one or more claims of the following Pulse US patents: 6,585,540 and 6,962,511 and 7,241,181 and 7,367,851 and 7,661,994 and 7,786,009 and 7,959,473 and 8,206,183 and 8,480,440.*
- 2) We realized the main technology of Pulse US patents mentioned is by utilizing the parallel direction connection way between the RJ terminals and the PCB, the upper and lower portion can connect to different connectors with various structures/function. However, such technology utilized can be found from same or similar patents which were released before Pulse Patent application date. Such as *China Patent No. 02234347.4 publication date Jul.30, 2003, US patent No. 2003/0022553 A1 Publication date: Jan.30, 2003, US patent No. 6659807and etc..*
- 3) Pulse your company's leading position in the industry is well known. All your patents are much heading the competitors. UDE is happy to see if there is any collaboration opportunity with Pulse thru obtaining specified patent licensing in the future for new business market development.

Shall you have further question on above statements, please don't hesitate to contact us.

Sincerely,

Gary Chen 

Chairman & CEO of UDE Corporation
