

EXHIBIT B

U.S. Patent No. 8,428,644 – Infringement of Claim 1 by LuMee Duo

The '644 Patent	Exemplary Support
<p>1. An apparatus comprising: an Integrated Lighting Accessory and Case for a mobile phone device;</p>	 <p>The LuMee Duo is an integrated lighting accessor and case for a smartphone such as the iPhone as shown here.</p>
<p>provide the protecting of mobile phone device case with an integrated ring of Light Emitting Diode (LED) lights in the case and to provide an illumination to be used in conjunction with functionality native to the phone device;</p>	<p>As shown above, the case protects an iPhone and also includes LED lights on its periphery. The lights are used in conjunction with taking photo such as selfies on the iPhone.</p> <p>According to LuMee’s website, the case is a “protective and durable case.” See, e.g., https://lumee.com/collections/lumee-duo/products/lumee-duo-iphone-7-6s-6-case?variant=28430847369.</p>
<p>the base part embedded electronic circuitry in the case with a portable power source that provides the ability to illuminate the LEDs simultaneously or selectively;</p>	<p>According to LuMee’s website, the case includes a rechargeable battery and charging cord. See, e.g., https://lumee.com/collections/lumee-duo/products/lumee-duo-iphone-7-6s-6-case?variant=28430847369.</p> <p>As shown above, the lights can be illuminated simultaneously.</p>

The '644 Patent	Exemplary Support
<p>the ring of LED lights are mounted in a recessed manner in the case, with each LED light being covered by a lens to provide for diffusion of the illumination;</p>	<p>As shown above, the lights are mounted under thermoplastic polyurethane (TPU), which acts as a lens to diffuse light.</p>
<p>the protective case house a separate docking port and/or extend the docking port native to the mobile phone device, thereby providing for a replacement identical docking port and optionally a mini and/or standard USB connection; wherein an additional port used to provide power and programmability to the LSD lights embedded in the case; further, the LED light ring illuminated to provide a diffused light source to be used in conjunction with professional photography and/or videography.</p>	<p>The LuMee case includes a micro USB cable and respective docking port for powering the lights.</p> <p>As shown above, the lights are mounted under thermoplastic polyurethane (TPU), which acts as a lens to diffuse light for better photography.</p>
