6. On information and belief, TSST and TSST Korea are subject to personal jurisdiction in Delaware under the Delaware Long-Arm Statute, 10 Del. Code § 3104, because they have engaged in, *inter alia*, sales and marketing services in Delaware and as such have submitted themselves to the jurisdiction of the Delaware courts.

7. Venue is proper in this Court pursuant to 28 U.S.C. §§ 1391(b) and (c).

PATENTS-IN-SUIT

8. On August 8, 2000, the United States Patent and Trademark Office duly and legally issued U.S. Patent No. 6,101,162 (“the ‘162 Patent”) entitled “Method and Apparatus for Initializing Rewritable Recording Media” to inventor Dae Young Kim. The ‘162 Patent relates to a method and apparatus for initializing a rewritable recording medium. A copy of the ‘162 Patent has been attached as Exhibit 1 to this Complaint.

9. On May 27, 2008, the United States Patent and Trademark Office duly and legally issued U.S. Patent No. 7,380,159 (“the ‘159 Patent”) entitled “Method and Apparatus of Recording Data in the Optical Recording Medium” to inventors Yong Cheol Park, MyongGu Lee, Jong In Shin, and Kyu Hwa Jeong. The ‘159 Patent relates to a recording medium and

apparatus, and a method for managing defective areas in the recording medium. A copy of the '159 Patent has been attached as Exhibit 2 to this Complaint.

10. On May 27, 2008, the United States Patent and Trademark Office duly and legally issued U.S. Patent No. 7,380,178 ("the '178 Patent") entitled "Method and Apparatus of Recording Data in the Optical Recording Medium" to inventors Yong Cheol Park, MyongGu Lee, Jong In Shin, and Kyu Hwa Jeong. The '178 Patent relates to an optical recording medium record/playback apparatus that manages defective areas in a rewritable optical recording medium. A copy of the '178 Patent has been attached as Exhibit 3 to this Complaint.

11. On November 5, 2002, the United States Patent and Trademark Office duly and legally issued U.S. Patent No. 6,477,126 ("the '126 Patent") entitled "Optical Recording Medium and Method of Assigning its Spare Area" to inventors Yong Cheol Park and Yong Hee Han. The '126 Patent relates to a rewritable optical recording medium and a method of assigning a spare area in the rewritable optical recording medium. A copy of the '126 Patent has been attached as Exhibit 4 to this Complaint.

12. Together, the '162 Patent, the '159 Patent, the '178 Patent, and the '126 Patent are referred to as "the Patents-in-Suit."

13. LGE Inc. possesses the full right and title to assert the Patents-in-Suit by reason of assignment.

14. LGE U.S.A. markets and sells products that practice the Patents-in-Suit in the United States.

BACKGROUND

15. Each of the Patents-in-Suit is essential to the practice of optical disc standards, including DVD+RW and/or DVD-RAM.

16. Defendants' products, namely optical disc drives and DVD writers, comply with the DVD+RW and DVD-RAM standards (the "Accused Products").

17. The DVD+RW standard specifies a physical format for rewritable DVDs.

18. The practice of the DVD+RW standard, as implemented by the Accused Products, infringes at least claim 18 of the '162 Patent.

19. The DVD-RAM standard specifies rewritable DVD-RAM media and the DVD writers used in, for example, computers as well as camcorders and personal video recorders.

20. The practice of the DVD-RAM standard, as implemented by the Accused Products, infringes at least claims 18, 19 and 28 of the '159 Patent; at least claims 12, 14 and 15 of the '178 Patent; and at least claims 1, 2 and 8 of the '126 Patent.

21. On information and belief, Defendants, either acting individually or in combination, offer to sell and/or sell within the United States and/or import into the United States the Accused Products.

22. On information and belief, Defendants, either acting individually or in combination, also offer to sell and/or sell the Accused Products to manufacturing companies, either directly or indirectly, who manufacture computers and other devices which include the Accused Products and then use, import, offer to sell and/or sell such computers and other devices in the United States, including in this judicial district.

23. On information and belief, Defendants, either acting individually or in combination, also offer to sell and/or sell the Accused Products to customers, either directly or indirectly, who use the Accused Products in the United States, including in this judicial district.

24. Defendants' websites indicate that the Accused Products practice the DVD+RW and DVD-RAM standards.

25. Product manuals also indicate that the Accused Products practice the DVD+RW and DVD-RAM standards.

26. On information and belief, Defendants were and continue to be aware of the existence of the Patents-in-Suit, that the Patents-in-Suit cover the DVD+RW and DVD-RAM standards, and of the opportunity to license the Patents-in-Suit, because LGE Inc's Optical Media Product patents were licensed to Toshiba Corporation ("Toshiba") and TSST, a licensed "affiliate" under the agreement, from December 30, 2005 through December 29, 2010.

27. Notwithstanding the fact that Defendants were and continue to be aware that the Accused Products practice the DVD+RW and DVD-RAM standards, and are infringing the Patents-in-Suit, Toshiba and TSST have failed to renew their license to the Patents-in-Suit, and Defendants therefore knowingly remain unlicensed.

DEFENDANTS' INFRINGEMENT

28. Defendants offer to sell and/or sell within the United States, and/or import into the United States, including in this judicial district, the Accused Products, which infringe (literally and/or under the doctrine of equivalents) the Patents-in-Suit.

29. The Accused Products are also incorporated into computers and other devices, which are manufactured, imported, used, offered for sale, and/or sold within the United States, including in this judicial district, which infringe (literally and under the doctrine of equivalents) the Patents-in-Suit.

30. The use of the Accused Products by customers also infringes (literally and under the doctrine of equivalents) the Patents-in-Suit.

31. Defendants contributorily infringe the Patents-in-Suit by offering to sell, selling, and/or importing the Accused Products in/into this judicial district and elsewhere, knowing, as a

result of Toshiba and TSST's previous cross-license with LGE Inc. regarding optical disc technology, as well as through Toshiba's participation in the standard setting organizations that adopted these standards, that (a) the Accused Products constitute material parts of inventions claimed in the one or more claims of the Patents-in-Suit; (b) the manufacturing, use, importation, sale and/or offer for sale of computers and other devices made with the Accused Products infringe one or more claims of the Patents-in-Suit; (c) customers' use of the Accused Products infringes one or more claims of the Patents-in-Suit; (d) the Accused Products are especially made for use in computers and other devices that infringe one or more claims of the Patents-in-Suit, and also for infringing use by customers; and (e) the Accused Products are not staple articles or commodities of commerce suitable for substantial noninfringing use.

32. Defendants actively induce the infringement of the Patents-in-Suit by encouraging and/or instructing others, including encouraging and instructing the manufacturers of computers and other devices to manufacture, use, import, offer for sale and sell computers and other devices containing the Accused Products, as well as encouraging and instructing customers of the Accused Products to use the Accused Products. Defendants know, as a result of Toshiba and TSST's previous cross-license with LGE Inc. regarding optical disc technology as well as through Toshiba's participation in the standard setting organizations that adopted these standards, that their encouragement and/or instruction with regard to the Accused Products causes the others, including the manufacturers of computers and other devices and the customers of the Accused Products, to infringe the Patents-in-Suit.

33. On information and belief, Defendants' determination that the Accused Products employ the DVD+RW and DVD-RAM standards, and its advertisement thereof, was done with the specific intent of encouraging others, including manufacturers which include the Accused

Products in their computers and other devices, and customers of the Accused Products, to infringe the Patents-in-Suit.

34. On information and belief, the direct infringement by the manufacturers of computers and other devices and by the customers of the Accused products that Defendants encourage actually occurs and has occurred, such that these computer companies manufacture, use, import, offer to sell, and/or sell computers and other devices that infringe one or more claims of the Patents-in-Suit, and these customers use the Accused Products that infringe one or more claims of the Patents-in-Suit.

35. As a direct and proximate result of Defendants' infringement of the Patents-in-Suit, LGE has been and continues to be damaged in an amount yet to be determined.

36. As a direct and proximate result of Defendants' infringement of the Patents-in-Suit, LGE has suffered irreparable injury for which there is no adequate remedy at law. Pursuant to 35 U.S.C. § 283, LGE is entitled to an injunction against further infringement by an order preventing Defendants from importing, selling and/or offering for sale any of Defendants' Accused Products in the United States.
